**REVISED DETERMINATION OF NONSIGNIFICANCE**

The Department of Fish and Wildlife has considered comments received on the original Threshold Determination for this project and is providing additional information which may be of interest to other agencies or the public. The information provided does not substantially change the analysis of the significant impacts in the existing environmental checklist.

**Name of Proposal:** SPENCER ISLAND TIDE GATE REPAIR

**Description of Proposal:** The proposed project is to maintain and repair an existing dike around pipes which have been eroded due to river eddy currents. The repair consists of pushing steel sheet piling into the river bank on each side of the pipes, and filling the area behind the piling and under the pipes with suitable dike material to protect and support them.

**The proponent shall incorporate the following mitigation measures into the project:**

1. Native woody vegetation shall be planted along the top of the dike to provide shading for migrating salmonids.
2. Woody debris along both edges of the dike will be incorporated into the project. The logs or other woody debris must be anchored to the streambanks to withstand 100-year peak flows.

**Proponent:** Washington Department of Fish and Wildlife, Engineering Division.

**Location of Proposal, including street, if any:** Spencer Island, Washington, Snohomish County; Section 15, Township 29 North, Range 05 East WM

**Lead Agency:** Washington Department of Fish and Wildlife

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of the completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

**There is no comment period for this Revised DNS.**
